

# Let us take the pain away

**Dimplex Renewables –  
instant relief from the  
headaches of specifying  
renewable energy solutions  
in educational premises.**

Renewable heating ✓ Renewable hot water ✓ Energy efficient radiators ✓  
Grants ✓ Site survey and assessment ✓ Match funding ✓  
Project management ✓ Service support ✓ Maintenance training ✓

As the UK's leading brand in renewable heating, we're in a unique position to offer you impartial advice to ensure you get the right solution for your project, whether new build or refurbishment.

With such a wide range of solutions, spanning ground and air source heat pumps, solar thermal and energy efficient heat distribution systems, we take a holistic approach to renewable heating. Add in grants, match funding and project management and we really can make the specification and installation of renewable energy solutions painless.

Completed installations range from rural primary schools to inner city schools with restricted space, and we are currently working with a large Sixth Form College, providing the heating, hot water and cooling solution for a multi-million pound new college complex. So whether you need a heating solution for a small school extension, or a complete campus, make the switch to Dimplex Renewables.
