

The future of commercial heating is changing dramatically. Rising fuel costs and the need to reduce carbon emissions are driving the demand for renewable technology.

As heating accounts for over half of a typical building's total energy use, it is the obvious area to target. Mitsubishi Electric have therefore pioneered a range of commercial **'heating only'** systems using heat pump technology to meet the challenges of commercial heating for today, tomorrow and beyond.

Ideal for use in new build or refurbishment, our advanced heat pump systems are recognised as renewable technology and provide a simple, cost-effective means of meeting tough renewable energy targets.

- Achieves renewable energy targets
- Reduces CO₂ and running costs
- Easy to design, install and maintain
- Works in conjunction with other systems
- Maximum scalability to suit all applications
- Eligible for Renewable Heating Incentive (RHI)
