

**FRESH AIR AND A GOOD
INDOOR CLIMATE ARE
IMPORTANT FOR OUR:**

- HEALTH**
- PRODUCTIVITY**
- LEARNING**

International studies show that productivity and learning can be increased by 10-15% when the right air quality and temperature are present. Natural Ventilation is the economically attractive and sustainable solution for a good indoor climate. Analysis has shown a CO₂ saving of up to 40% compared to traditional mechanical ventilation systems.

WindowMaster offers three different ventilation solutions, depending on the requirements of your project:

NV Advance™

The advanced indoor climate solution for larger buildings with many individually controlled climate zones, based on both purely natural ventilation as well as hybrid ventilation - with advanced user interface software and logging of climatic data. The system can be fully integrated with other building management solutions.

NV Comfort™ NEW!

The cost effective indoor climate solution for smaller projects, such as offices or schools, with a limited number of individually controlled climate zones, based on both purely natural ventilation as well as hybrid ventilation - with easy adjustment via touch-screen panel.

NV Solo™

The simple solution for ventilation of projects with a single climate controlled zone - based on pure Natural Ventilation.

WindowMaster has been involved in over 1,000 projects with Natural and Hybrid Ventilation, and has built a strong competence and experience in the field.
